# Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |
|--|---|
| Classification of the substance or mixture | : COMBUSTIBLE DUSTS<br>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1<br>CARCINOGENICITY - Category 1A   |
|  | Percentage of the mixture consisting of ingredient(s) of unknown oral toxicity: 18.9%<br>Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 18.9%<br>Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 18.<br>9% |
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | : Danger  |

# Section 2. Hazards identification

| Section 2. Mazar                    |  |
|-------------------------------------|--|
| Hazard statements                   | <ul> <li>May form combustible dust concentrations in air.</li> <li>Causes serious eye irritation.</li> <li>May cause an allergic skin reaction.</li> <li>May cause cancer.</li> </ul>  |
| Precautionary statements            |  |
| Prevention                          | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.  |
| Response                            | : IF exposed or concerned: Get medical attention. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. |
| Storage                             | : Store locked up.   |
| Disposal                            | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>  |
| Supplemental label<br>elements      | WARNING: This product contains chemicals known to the State of California to cause<br>cancer. FOR INDUSTRIAL USE ONLY.   |
|                                     | Please refer to the SDS for additional information. Keep out of reach of children. Do not transfer contents to other containers for storage.   |
| Hazards not otherwise<br>classified | : DANGER: Rags, steel wool, other waste soaked with this product, and sanding residue may spontaneously catch fire if improperly discarded. Immediately place rags, steel wool, other waste soaked with this product, and sanding residue in a sealed, water-filled, metal container. Dispose of in accordance with local fire regulations.  |

# Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

#### CAS number/other identifiers

| Ingredient name                        | % by weight | CAS number |
|--|-------------|------------|
| Calcium Carbonate                      | 40.42       | 471-34-1   |
| Glass                                  | 35          | 65997-17-3 |
| Rosin, maleated, polymer with glycerol | 15          | 68038-41-5 |
| Rosin Ester                            | 2.5         | 68201-57-0 |
| Magnesium Carbonate                    | 2.24        | 546-93-0   |
| Titanium Dioxide                       | 1.38        | 13463-67-7 |
| Crystalline Silica, respirable powder  | 0.34        | 14808-60-7 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

| Description of necess | <u>ary first aid measures</u>   |
|-----------------------|---|
| Eve contect           | Immediately fluck every with planty of water, econorianally lifting the |

Eye contact

: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

| Date of issue/Date of revision : 8/10/2017 Date of pre- | vious issue : 4/19/2017 | Version | :5 | 2/12 |
|---|-------------------------|---------|----|------|
|---|-------------------------|---------|----|------|

# Section 4. First aid measures

| Inhalation               | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If<br>not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial<br>respiration or oxygen by trained personnel. It may be dangerous to the person providing<br>aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place<br>in recovery position and get medical attention immediately. Maintain an open airway.<br>Loosen tight clothing such as a collar, tie, belt or waistband.   |
|--------------------------|---|
| Skin contact             | : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse. For contact with molten product - Cool molten product adhering to skin as quickly as possible with cold water or ice. Continue to cool for an extended period. DO NOT attempt to remove product from skin as this may result in tissue damage. Seek medical attention immediately for removal of the adhering product and treatment of burn.                            |
| Ingestion                | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Most important symptom   | s/effects, acute and delayed  |
| Potential acute health e | ffects  |
| Eye contact              | : Causes serious eye irritation.  |
| Inhalation               | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.  |

- Skin contact : May cause an allergic skin reaction. DO NOT allow molten product to come in contact with skin.
  - : No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

Ingestion

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion    | : No specific data.  |

| Indication of immediate med | dical attention and special treatment needed, if necessary  |
|-----------------------------|---|
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

|--|

## Section 4. First aid measures

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| l | 00      | 011011         | •••• |      | <br>mododi | Ŭ |
|---|---------|----------------|------|------|------------|---|
|   | Tree 41 | a sur la la la |      | dia. |            |   |

| <u>Extinguishing media</u>                     |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical powder.  |
| Unsuitable extinguishing media                 | : Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.   |
| Specific hazards arising from the chemical     | : May form explosible dust-air mixture if dispersed.  |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without suitable<br>training. Move containers from fire area if this can be done without risk. Use water<br>spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

# Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing dust. Provide adequate<br>ventilation. Wear appropriate respirator when ventilation is inadequate. Put on<br>appropriate personal protective equipment.   |
|--------------------------------|-----|--|
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | nta | ainment and cleaning up  |
| Small spill                    | :   | Move containers from spill area. Use spark-proof tools and explosion-proof equipment.<br>Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a<br>HEPA filter and place in a closed, labeled waste container. Place spilled material in a<br>designated, labeled waste container. Dispose of via a licensed waste disposal<br>contractor.  |
| Large spill                    | :   | Move containers from spill area. Use spark-proof tools and explosion-proof equipment.<br>Approach release from upwind. Prevent entry into sewers, water courses, basements<br>or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with<br>equipment fitted with a HEPA filter and place in a closed, labeled waste container.<br>Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed<br>waste disposal contractor. Note: see Section 1 for emergency contact information and<br>Section 13 for waste disposal. |

# Section 7. Handling and storage

| Precautions for safe handling                                      | L |   |
|--|---|---|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in a segregated and approved area.<br>Store in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in<br>unlabeled containers. Use appropriate containment to avoid environmental<br>contamination. See Section 10 for incompatible materials before handling or use.  |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

Occupational exposure limits (OSHA United States)

| Ingredient name  | Exposure limits   |  |  |
|--|---|--|--|
| Calcium Carbonate  | <ul> <li>NIOSH REL (United States, 10/2016).<br/>TWA: 5 mg/m<sup>3</sup> 10 hours. Form: Respirable<br/>fraction<br/>TWA: 10 mg/m<sup>3</sup> 10 hours. | Ingredient name                       | Exposure limits |  |  |  |
|---------------------------------------|-----------------|--|--|--|
| None.                                 |                 |  |  |  |
| Occupational exposure limits (Mexico) |                 |  |  |  |

# Ingredient name Exposure limits None. Image: Comparison of the second second

| Appropriate engineering controls                                    | Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor<br>or mist, use process enclosures, local exhaust ventilation or other engineering controls<br>to keep worker exposure to airborne contaminants below any recommended or statutory<br>limits. The engineering controls also need to keep gas, vapor or dust concentrations<br>below any lower explosive limits. Use explosion-proof ventilation equipment.                                      |
|---|---|
| Environmental exposure<br>controls<br>Individual protection measure | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Hygiene measures  | <ul> <li>Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.</li> <li>Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.</li> </ul> |

| Date of issue/Date of revision | : 8/10/2017 | Date of previous issue | : 4/19/2017 | Version : 5 | 6/12 |
|--------------------------------|-------------|------------------------|-------------|-------------|------|
|--------------------------------|-------------|------------------------|-------------|-------------|------|

# Section 8. Exposure controls/personal protection

| Eye/face protection    | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. If operating conditions cause high dust concentrations to be produced, use dust goggles.   |
|------------------------|---|
| Skin protection        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When working with molten product wear heat-resistant gloves. |
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

# Section 9. Physical and chemical properties

# Section 10. Stability and reactivity

| : No specific test data related to reactivity available for this product or its ingredients.  |
|---|
| : The product is stable.  |
| : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| : Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Prevent dust accumulation. |
| : Reactive or incompatible with the following materials:<br>oxidizing materials   |
| : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |
|   |

## Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Special precautions for user : Multi-modal shipping descriptions are provided for informational purposes and do not consider container sizes. The presence of a shipping description for a particular mode of transport (sea, air, etc.), does not indicate that the product is packaged suitably for that mode of transport. All packaging must be reviewed for suitability prior to shipment, and compliance with the applicable regulations is the sole responsibility of the person offering the product for transport. People loading and unloading dangerous goods must be trained on all of the risks deriving from the substances and on all actions in case of emergency situations.

# Section 16. Other information

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

#### Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by Sherwin-Williams, including but not limited to the incorporation of non Sherwin-Williams products or the use or addition of products in proportions not specified by Sherwin-Williams. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer: the customer/buver/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
